
The Project “Enhancement of the mobility and employability of Lithuanian and Latvian specialists in the field of electrical engineering and high voltage technologies”

Lithuanian Maritime Academy together with partners: Kaunas Technical College (Lithuania), Liepaja Marine College (Latvia), Riga Technical University Ventspils Branch (Latvia) and Ventspils Technical College are implementing the Project “Enhancement of the mobility and employability of Lithuanian and Latvian specialists in the field of electrical engineering and high voltage technologies” (LLI-24- LitLatHV) under Interreg V-A Latvia-Lithuania programme 2014-2020.

Project title: Enhancement of the mobility and employability of Lithuanian and Latvian specialists in the field of electrical engineering and high voltage technologies

Project acronym: LitLatHV

Project No.: LLI-24

Project partners:

Lead partner: Lithuanian Maritime Academy

Partners: PP2-Kaunas Technical College (Lithuania), PP3-Liepaja Marine College (Latvia), PP4-Riga Technical University Ventspils Branch (Latvia) and PP5-Ventspils Technical College (Latvia)

Project duration: 01.04.2017 – 31.03.2019 (24 months)

Project objective: to increase job opportunities by improving mobility and workforce skills of Lithuanian and Latvian specialists in the field of electrical engineering and high voltage technologies.

Project funding: project total grant amount – 915 322,51 EUR (778 024,10 EUR – 85 % ERDF and 137 298,41 EUR – 15% National public co-financing). LMA receives 355 127,83 EUR, of which 301 858,65 EUR – ERDF and 53 269,18 EUR – Lithuanian State budget funding.

Target groups: students and teachers of project partners’ institutions, employees and employers from maritime and shore industries.

Main project activities:

1. Purchasing and installation of specialised education and training equipment in each partnering institution (6 sets of equipment).
2. Upgrade/development of programmes of study subjects for students (13 programmes) and qualification upgrading programmes for working specialists (2 programmes).
3. Preparation of methodical materials of 14 titles in 3 languages.
4. Cross-border and international experience exchange: Events of joint interexchange of experience; Internship of joint team of teachers; Joint pilot training events.

In parallel with the above mentioned main activities throughout the project exchange activities, visits at prospective employers premises and other activities will be held. Also training activities for employees and students of the institutions for development of competences, as well as skills within the fields of electrical engineering and high voltage technologies will be organized.
